INDEX TO VOLUME 11: 1989

AUTHOR

Amory, B Legal aspects of the protection of data centres 72
Cerullo, M and Cerullo, V Approaches to organizing computer facilities 165
Courtney, R Proper assignment of responsibility for data security 83
Er, M C Is a database a corporate resource? 106
Fastiggi, M V Detection of surreptitious insertion of Trojan horse or viral code in computer application programs 3
Grewlich, K Transborder data flows — a field of action for foreign trade diplomacy 67
Harris, R W Policy-oriented view of computer technology 25
Jonckheer, K and Scarbrough, M Security of data transmitted via telephone, fibre optics and microwaves 99
Kobus, P Jr and Rovin, G H C-Guard Computer Security System 41
Liebowitz, J How much 'artificial stupidity' do expert systems possess? 225
Liebowitz, J Possible impacts of artificial intelligence 155
Lobel, J Managing of information security in the space age 195
Madsen, W Effect of transborder data flow upon information security and integrity 131
Ozier, W Risk quantification problems and Bayesian Decision Support System solutions 229
Pendleton, R On-line smart card terminal: a case study 171
Potts, R J Emission security 151
Preston, C M Artificial intelligence applied to information system security 217
Quant, H Virus versus vaccine 138
Reid, M A and Madan, M S IC card design: technology issues 211
Saari, J and Parker, D B New baseline methodology in reviewing security experiences from USA and Finland 19
Sauvant, K P Trade in services: the impact of data techniques 37
Shahabuddin, S Role of MIS services in a microcomputer environment 160
Shpizner, M J Congress passes new legislation protecting licensees of intellectual property 199
Sizer, R Computer security — a pragmatic approach for managers 88
Skubiszewski, M Security of Ethernet under Unix and Internet protocol 144
Yngström, L Experiences from a one year academic programme in security informatics 77
Yovel, S On viruses and top managers 202

TITLE

Approaches to organizing computer facilities **Cerullo, M and Cerullo, V** 165
Artificial intelligence applied to information system security **Preston, C M** 217
C-Guard Computer Security System **Kobus, Jr, P and Rovin, G H** 41
Computer security — a pragmatic approach for managers **Sizer, R** 88
Congress passes new legislation protecting licensees of intellectual property **Shpizner, M J** 199
Detection of surreptitious insertion of Trojan horse or viral code in computer application programs **Fastiggi, M V** 3
Effect of transborder data flow upon information security and integrity **Madsen, W** 131
Emission security **Potts, R J** 151
Experiences from a one year academic programme in security informatics **Yngström, L** 77
How much 'artificial stupidity' do expert systems possess? **Liebowitz, J** 225
IC card design: technology issues **Reid, M A and Madan, M S** 211
Is a database a corporate resource? **Er, M C** 106
Legal aspect of the protection of data centres **Amory, B** 72
Managing of information security in the space age **Lobel, J** 195
New baseline methodology in reviewing security experiences from USA and Finland **Saari, J and Parker, D B** 19
On-line smart card terminal: a case study **Pendleton, R** 171
On viruses and top managers **Yovel, S** 202
Policy-oriented view of computer technology **Harris, R W** 25
Possible impacts of artificial intelligence **Liebowitz, J** 155
Proper assignment of responsibility for data security **Courtney, R** 83
Risk quantification problems and Bayesian Decision Support System solutions **Ozier, W** 229
Role of MIS services in a microcomputer environment **Shahabuddin, S** 160
Security of data transmitted via telephone, fibre optics and microwaves **Jonckheer, K and Scarbrough, M** 99
Security of Ethernet under Unix and Internet protocol **Skubiszewski, M** 144
Trade in services: the impact of data techniques **Sauvant, K P** 37
Transborder data flows — a field of action for foreign trade diplomacy **Grewlich, K** 67
Virus versus vaccine **Quant, H** 138

SUBJECT

Book reviews 46, 113, 175, 235
Calendar 64, 127, 191, 246
